PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence & Machine Learning student with hands-on experience in Python, machine learning, NLP, MySQL, Streamlit and web application development. Built an NLP-based spam detection project, a deployed Python/Streamlit portfolio with MySQL connectivity, and a complete interactive restaurant ordering web application using HTML, CSS and JavaScript. Seeking a Backend AI Engineer Internship to strengthen backend development, APIs and Generative AI application skills.

TECHNICAL SKILLS

Programming: Python, SQL, Java (Basics)
AI / ML: Machine Learning, NLP, scikit-learn, NLTK, TF-IDF, pandas, NumPy
Backend: FastAPI (Basics), Streamlit, Backend Fundamentals
Database: MySQL, SQL, CRUD, Database Connectivity
Web: HTML, CSS, JavaScript, DOM Manipulation, localStorage
Tools: Git, GitHub, VS Code, Jupyter Notebook, Power BI, Excel

PROJECTS

The Indian Thali — Interactive Restaurant Ordering Web Application | *HTML, CSS, JavaScript*

- Developed a complete multi-page restaurant application with menu browsing, dish search, category-based interaction, dish-details modal, login flow, cart, checkout, reservation and responsive UI.
- Implemented JavaScript-based cart management using localStorage, including cart persistence, quantity handling, cart count and checkout total calculation.
- Added client-side login-state protection for checkout and interactive DOM-based user flows.

ML Spam Detection | *Python, pandas, NumPy, scikit-learn, NLTK*

- Built an NLP-based spam classification workflow with text cleaning, stopword removal, stemming, TF-IDF vectorization and machine-learning classification.
- Performed feature engineering using word count, sentence count and character count features.
- Worked through the end-to-end pipeline from data preprocessing and feature engineering to model evaluation and prediction.

Python + Streamlit Portfolio | *Python, Streamlit, MySQL, Git/GitHub*

- Built and deployed a modular developer portfolio with dynamic project, skills, certifications, achievements and profile sections.
- Connected the application with MySQL for database-driven content and implemented reusable Streamlit components, custom CSS and session-state based functionality.
- Used Git/GitHub for version control and deployed the application on Streamlit Cloud.

Customer Behaviour Analysis | *Python, SQL, Power BI*

- Used Python for data cleaning, preprocessing and exploratory analysis of customer behaviour data.
- Used SQL to query, filter, aggregate and analyze customer-related data.
- Built an interactive Power BI dashboard to visualize customer behaviour, trends and key business insights.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning | Ambalika Institute of Management & Technology, Lucknow
Current: 7th Semester | Expected Graduation: 2027

CERTIFICATIONS

Python — HackerRank | Training & Project Completion Certificates

ACHIEVEMENTS & LEADERSHIP

- Department Topper, highest SGPA reported: 8.67.
- Participated in SRMS Hackathon 4.0 (36-hour), Ambalika Ideathon and CodeBlitzz Osen hackathon.
- Technical Club / SDC involvement with event coordination and student activities.
